

COGNITIVE NEUROPSYCHOLOGY

Student Travel Prizes

To recognize and promote outstanding research by young researchers in the field of cognitive neuropsychology, the journal *Cognitive Neuropsychology* will award six travel prizes annually to graduate students or post-doctoral students. The prizes will consist of awards of up to \$750 (US) that can be applied for costs of travel, lodging and registration fees for students presenting a poster or a talk reporting on original cognitive neuropsychological research at a conference.

Cognitive neuropsychological research is defined as research that falls within the Scope and Aims of the journal *Cognitive Neuropsychology*: the investigation of human cognition that is based on neuropsychological methods including behavioral studies of individuals with brain pathology, as well as neural recording, stimulation or imaging. The research can involve brain-lesioned, developmentally impaired or neurologically-intact adults, children or non-human animals as long as it makes an explicit contribution to our understanding of normal human cognitive processes and representations. Cognition is understood broadly to include the domains of perception, attention, planning, language, thinking, memory and action. *In short, the goals of the research should be: cognitive, the methods: neuro-psychological.*

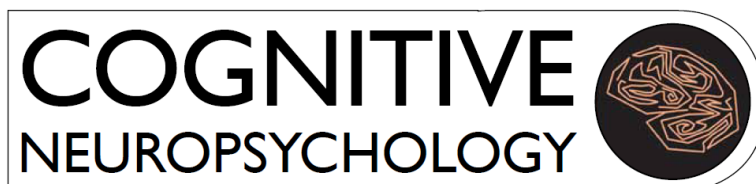

Deadlines: February 15th and September 1st

Application: (1) CV, (2) abstract of the talk or poster to be presented, (3) Brief (one paragraph) explanation of how the research falls within the Scope and Aims of *Cognitive Neuropsychology* (described just above), (4) documentation that the talk or poster has been accepted (when available), (5) name and dates of the conference, and (6) letter from research supervisor or mentor indicating your status as a graduate or post-doctoral student and describing your role in the research project to be presented.

Review: Applications will be reviewed by a committee of Cognitive Neuropsychology editors and decisions will be made within 4 weeks of the deadlines.

Contact: Submit application and receipts to sarah.scoffield@tandf.co.uk.

Conditions: (a) Prize recipients must submit receipts for travel, lodging and/or conference registration after attending the conference and will be reimbursed up to \$750 (US), (b) Prize recipients will recognize the support provided by *Cognitive Neuropsychology* by including an acknowledgment statement within the poster or spoken presentation. The acknowledgement should include the following logo:
